13.03.2024

Dear Sir/Madam,

I am writing to express my keen interest in the software developer position at Safaricom PLC as an intern for industrial attachment. As a highly motivated computer science student with a passion for frontend web development and product design, I am confident that my skills and experiences align perfectly with the requirements of this role.

During my academic journey, I have gained a strong foundation in various programming languages like **HTML, CSS, JavaScript, Typescript, and PHP**, as well as frameworks like **React**. I have honed my skills by actively participating in hackathons, where I thrived in fast-paced environments to develop creative solutions. In **Africa's Talking Hackathon**, I played a key role in building the frontend for a USSD platform for a helpdesk incorporating voice, which garnered **positive user feedback**.

Furthermore, I am a strong believer in open-source contributions. I have actively contributed to projects on Github, demonstrating my commitment to collaboration and continuous learning. Additionally, my experience in product design helps me create user-centric interfaces that are both visually appealing and functionally sound.

I am a highly motivated and quick learner with excellent problem-solving and communication skills. I am confident that I can seamlessly integrate into your team and contribute meaningfully to your projects. My resume details my qualifications further, and I am eager to discuss how my skills can benefit Safaricom.

Thank you for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Stephen Mwangi
